

Set Up Multi-Factor Authentication (MFA) with YubiKey

INFORMATION SHEET

WHAT DO I NEED TO KNOW?

TAFE NSW has introduced MFA for Students to help ensure the safety of our students' information. PingID is the MFA software used by TAFE NSW. This guide will show you how to set up MFA using a YubiKey.

To complete this set up, you will need an Internet connected computer to log in on (it can be your own or a TAFE one), and your YubiKey.

Steps

Step 1 – Log in to the TAFE Portal

Detailed steps	Screenshots
On your computer, log in to the TAFE Portal at https://my.tafensw.edu.au .

Step 2 – Activate MFA and Pair with your YubiKey

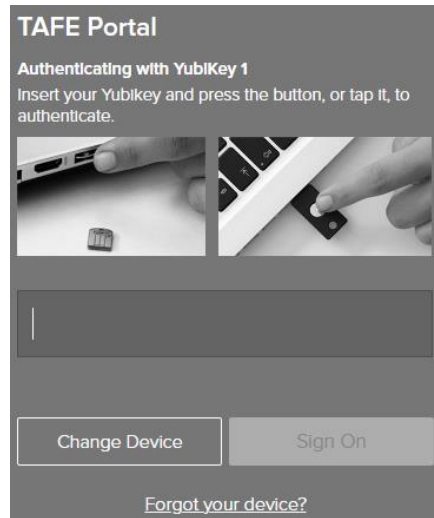

Detailed steps	Screenshots
When you log in to a TAFE NSW system with your username and password for the first time, you will see the Activate MFA screen. If you click on “YES”, you will then see the “Welcome to PingID” screen on your computer. You can then click on “START” to begin the process. If you do not want to use MFA at all, you can click on “NO”.	Activate MFA Multi Factor Authentication (MFA) is important to keep your TAFE NSW digital information safe. As a student at TAFE NSW, you can choose to activate MFA. To know more about MFA, please visit https://www.tafensw.edu.au/mfa • Select 'Yes' to activate MFA • Select 'No' if you do not want MFA Activate MFA? YES NO Welcome to PingID TAFE NSW is making your accounts more secure! PingID is the multi-factor authentication (MFA) application that makes it easy to verify your identity as you access TAFE systems and applications. For help click here START Click on Start to begin the pairing process.
If you clicked on “YES” and “START” in the previous step, your computer screen will show an “Add a New Device” screen. You will now need to click on “YubiKey”.	Add a New Device PingID Mobile Application For the best experience, install PingID and scan the QR code to pair your mobile device. You can also enter the pairing code manually when required.  Pairing Code:   Other Authentication Methods     Yubikey Security Key Desktop Authenticator Click on “Yubikey” to start the pairing process with your YubiKey.

Set Up Multi-Factor Authentication (MFA) with YubiKey

INFORMATION SHEET

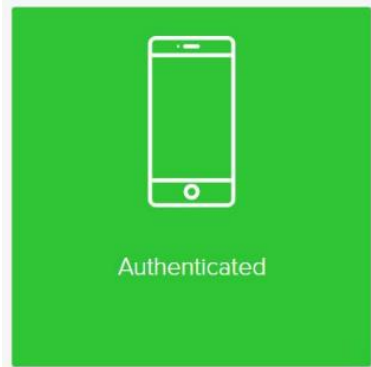

Detailed steps	Screenshots
When the “Yubikey” screen appears, insert your YubiKey into an available USB port on your computer. Your computer will detect the YubiKey and ready it for use. You can then gently hold your finger down on the “y” button on your YubiKey and it will fill in the code onscreen and log you in. You should then be Authenticated and logged in.	 Plug in your YubiKey and hold your finger on the “y” button.

Step 3 – Logging in with your YubiKey each day

Detailed steps	Screenshots
From now on, when you log into your TAFE account with your password, you will need your YubiKey with you. It is a good idea to keep your YubiKey on a keyring so that you do not lose it or forget to keep it with you. After typing in your TAFE password, you will see a screen asking you to plug in your YubiKey. Plug your YubiKey into an available USB port on the computer and gently hold your finger on the “y” button on the YubiKey.	 Plug in your YubiKey and hold your finger on the “y” button.
